

Value-Stream Flow

A seminar for small business owners, entrepreneurs and mid-level to senior-level managers, directors or executives who lead teams and projects requiring strong management skills.

Course Description:

In this course participants will learn how lean flow and value-centered management work hand in hand to create a smooth flowing, efficient operation. Statistics show that almost 70% of our daily work is spent on non-value added or wasteful activities. Whether it's waiting for approvals or producing unnecessary reports. This eye-opening course will transform the way you see any work activity. You'll learn how to identify non-value added activities and strategies to eliminate them for good. Leaders today are faced with increasing productivity to fulfill customer demand. By identifying inefficient processes, barriers will be removed that will change your focus from working faster to **making work move faster**.

WHAT WE WILL COVER

1) Value-Centered Fundamentals & Customer Value

- Understanding process times to operate with speed and precision.
- Cost reduction principles to maximize profit.
- Resource reallocation to create new value opportunities.
- How to see the 7 Non-Value Added activities in order to eliminate waste and reduce costs.
- Making your Customer the focus of the Company.

2) Non-Lean Flow~ Simulation Activity 1

- Participate in a real simulation, exposing the danger of a non lean flow and an unorganized operation.

3) Value-Centered Flow

- Learn the importance of making value flow and why this directly impacts customer service and the bottom line profits of any organization.

4) Lean Flow~ Simulation Activity 2

- Experience the power of a Lean Flow simulation and witness the phenomenal results created when using this Proven approach to business.

5) Silos Vs. Flow

- Learn why departmental and silo thinking is destroying companies all over the world and why the new competitive advantage is to structure your business based on the flow of value.

PARTICIPANTS WILL RECEIVE:

- Certification in the Principles of Value Stream Flow
- Padfolio and workbook
- Autographed copy of "Who Said So"
